

# Worm Farming Workshop

Whether you want to sell worms as bait or create awesome organic compost, you'll want to do it the smart way. In this class, you will build your own "starter" worm farm, examine an existing worm farm, learn about the biology and care of worms, and talk about maintenance and trouble shooting. You will also begin the development of a business plan focused around your worm farm and the possible products it can produce.

**Who**  
?

Interested youth 11-19 (as of Jan. 1st, 2015). Class maximum size is 15, so register early!
