

# COVER CROP FIELD DAY

MENOMINEE COUNTY  
WEDNESDAY, AUGUST 3<sup>RD</sup> @ 11 AM CST

Follow the progress of the cover crop research on  
the Steve Brock Dairy Farm.

In 2015, MSU partnered with the dairy and Byron Seeds, LLC to develop a trial to test various cover crop treatments in a rotation that followed sorghum chopped for the dairy herd and before a season of corn silage. The cover crop treatments were planted immediately following the late-summer 2015 harvest.
